

Pit Kits & Cutom Products

Pit Kits

Designed to allow trench shield panels to connect together without the need of spreader pipes or shield modification, the GME Pit Kit Corner Connectors offer users the ability to further utilize their fleet by having trench shield panels act as end panels. The GME Pit Kits are designed to allow for either horizontal or vertical collar pin holes.

Custom Products

With 150,000+ square feet of available manufacturing space, coupled with a highly skilled labor force, a dedicated R&D team and a desire to provide customers with solutions, GME takes pride in custom projects. Whether they be a custom tweak to an otherwise standard trench shield or a completely new take on how to increase job-site productivity, GME has the ability and know how to make it work!
